

IMPORTANT

1. DO NOT FORGET TO RECORD YOUR SCREEN
2. USE OF AI TOOLS OR ANY OTHER AIDS NOT ALLOWED

Grade 3:

Use the entry ticket as the base and make the following changes:

- Add a new menu option called **Change title**. The user shall be able to pick the new option using the letter **C** when selecting a menu option.
- The new menu option shall ask the user to input a new title for the shopping list and if the new title is not the same as the old one, and if it is not an empty string, it shall replace the previous title.
- The following message shall be shown if the new title is the same as the old one:

INFO: The new title is the same as the old one.

- If the user tries to enter an empty string when changing the title, the following message shall be shown:

ERROR: Title can not be empty.

NOTE: The student can safely assume that the user will always enter a valid title that is not an empty string when the script first starts.

Grade 4:

After passing all the automated tests for grade 3, continue by adding the following functionality:

- Change how the title is displayed on the final shopping list so that it clearly communicates if the title was changed or not.
- If the title was never changed, the final shopping list shall have exactly the same format as before. But if the title was changed, add a new line with the tag **(edited)** centered just below the title as can be seen in the example below:

```
-----  
Shopping  
(edited)  
-----
```

NOTE: There shall **not** be an extra empty line in the header if the title was not changed.

Grade 5:

After passing all the automated tests for Grade 4, continue by adding the following functionality:

- Add a secret *Easter egg* that prints the message “You are the best!” ten times to the screen if the user uses the new menu option **Change title** and changes the title to “Who is the best?”.
- The message shall be printed after the user completes the title change, but before the user is returned back to the menu.
- To make the message more special, it shall be given a border of stars. The total width shall be 21 characters, and each line inside the border shall both start and end with one empty space to make it easier to read the text.

```
*****
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*  You are the best!  *
*****
```

- For any other new title besides the secret phrase “Who is the best?” the script shall work just as before, not hinting the user about the secret Easter egg.

What is an *Easter Egg*?

An Easter egg is a message, image, or feature hidden in software, a video game, a film, or another—usually electronic—medium. The term used in this manner was coined around 1980 by Steve Wright, the then-Director of Software Development in the Atari Consumer Division, to describe a hidden message in the Atari video game *Adventure*, in reference to an Easter egg hunt.
